JWT Mongoose nodemailer

PROJECTS

Chatting Application

Front-End Developer

- Developed a chat application using **React.js** and **Firebase** with real-time messaging and user authentication.
- Built a responsive and secure interface for desktop and mobile devices.
- Optimized **Firestore** database and real-time data updates for high performance and scalability.

Hospital Management System

Front-End Developer

- Developed a **modular and scalable sidebar navigation** using **React.js** and **Tailwind CSS**, supporting **100+ menu items** across multiple modules (Registration, Diagnostic, Pharmacy, OPD/IPD, OT, Reports).
- Implemented **collapsible menus with sub-items** using **React state** and designed the **component structure** for **responsive UI, maintainability, and future expansion**.

Shortener

Full Stack Developer

- Developed** a full-stack URL shortening application using **JavaScript**, **Node.js**, and **Express**, enabling conversion of long links into short, shareable URLs.
- Developed frontend and backend components to accept input, generate codes, and redirect users.
- Implemented a link management system for reliable performance and scalability.

E-Commerce

Full Stack Developer

- Developed an e-commerce web application with separate client and server modules using **JavaScript**.
- Built a frontend shopping interface allowing users to browse products, add to cart, and submit orders.
- Implemented backend services to handle product data, user interactions, and order processing.
